

ESCUTCHEON KIT

ESCUTCHEON KIT

DETAILS

Hinged Escutcheon (Internal Door) kit for FSR enclosures.

DIMENSIONS

380H 270W 60D approx. 3kg

CONSTRUCTION

1.5mm AISI 304 Stainless Steel
N4 Brushed Finish
180° Hinges
7mm Square Key AISI 316 SS Cam Lock
Stainless Steel T-Handle
Stainless Steel Fasteners
M6 Door Earth Stud

MOUNTING

Four $\varnothing 6.5$ mounting points are provided.

PURPOSE

The Escutcheon Kit is specifically designed to protect electrical equipment from exposure to storm conditions, high levels of airborne particulate matter or where it is necessary to limit access to authorised personnel. It is an internal component of the FSR enclosure.

SPECIFICATION

AISI 304 Stainless Steel offers a high degree of corrosion protection. Additional protection is provided by the AISI 316 Stainless Steel body of the FSR enclosure.

The Escutcheon Kit is classified as providing IP42 protection. It is suitable for intermittent exposure to storm conditions. It does not provide complete protection from the ingress of moisture.

INDUSTRIES

Chemical Handling, Food Processing, Water Treatment, Manufacturing and Mining applications.
